Module 8.2 Assignment

Begin

import json

Define
load_students(filename)
and
print_students(students
_list)

filename =
'student.json'

students_list =
load_students(filename)

Output: Print original
Student List from
'student.json'

Define new_student, a
new set of data for the
.json file

Append the new data
set into 'student.json'

Output: Print Updated
Student List from
'student.json', post-
append

Save the updated list to
'student.json'

Output: Notify the user
that the JSON file has
been updated via print()

End
